Calle Raos-Galera, 33. 39600 Maliaño (Cantabria) SPAIN

May 2019
ExCeL London

Due to a constantly increasing demand from the UK market by both consultants and lift companies, GLE is proud to announce the launch of an improved lift package. The popular Enviro Progress lift package has been developed and improved to be perfectly adapted to requirements for more-robust lift packages designated for top-of-the-range, bespoke installations and is now available with the following optional features:

-
1. **Conventional 2:1 roping with conventional pulleys car frame**
 2. **Ziehl Abegg machine with the capacity for 240 starts/hour**
 3. **16mm car guide rails**
 4. **OSG not car-mounted**
 5. **Heavy-duty Pegasus or Robusta car and landing doors with the option for EN81-71 Cat. I and EN81-71 Cat. II compliance**
 6. **Reinforced brackets.**
-

GLE is, therefore, delighted to be able to offer a lift package solution which will meet even the most state-of-the-art, technically demanding lift specifications, not only for higher-capacity lifts but also for any type of smaller passenger lift.
